

Windows Computer *Wireless* LG TV Display

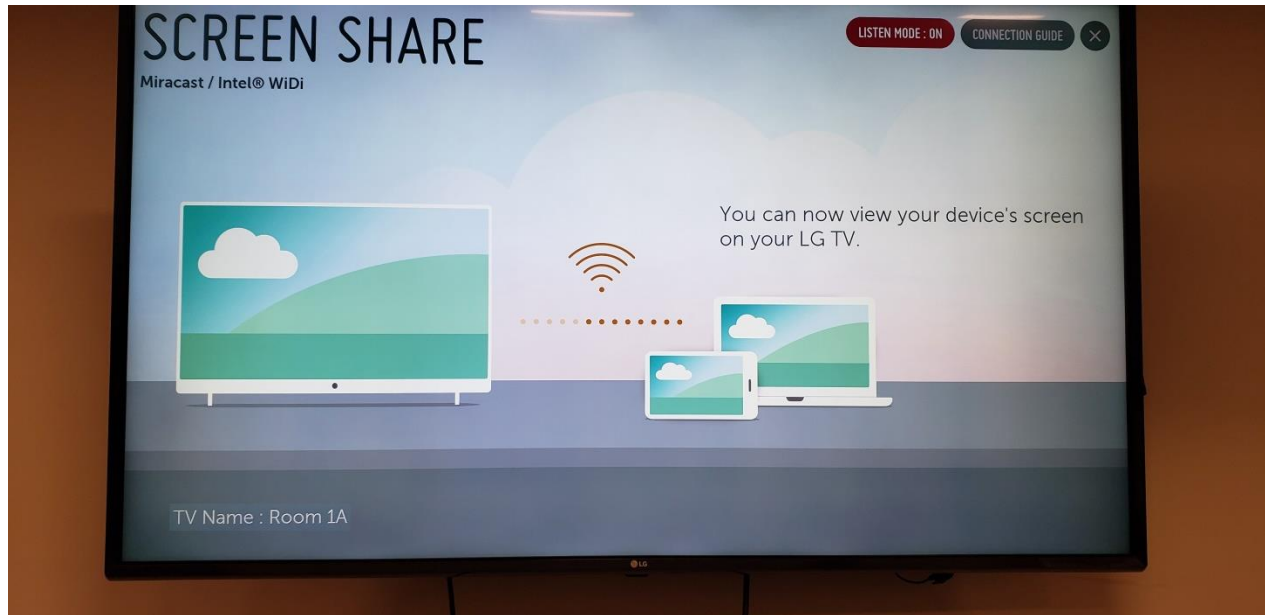

This description is specific to the Calendar House LG television set-up and may not work with other systems.

1)The laptop MUST be connected to the Calendar House 'TOS-Guest' WiFi system AND Bluetooth MUST be turned on.

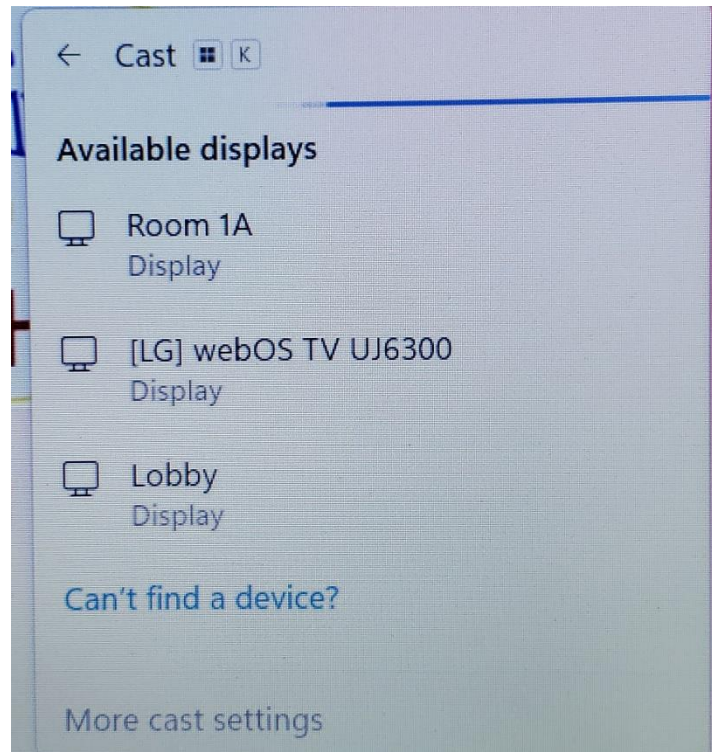

2) Turn power on using the LG TV remote, then choose the button on the top right of remote. Scroll to bottom of TV screen on the right until Screen Share is highlighted using the arrow keys on remote, then use the OK button to select the option.

3) The **bottom left** of the TV screen will now show the name of the TV.

4) On your Laptop, press and hold the Windows key and then click the K key on your keyboard. In a few seconds an image like the one below will appear.

5) Then click the name of the TV shown under item 3). After a few seconds the computer screen image should show on the TV.
